

Up to 55%
Less Breathing
Resistance

LPR-100™ Gen II

Increase comfort and breathability without sacrificing protection.

Key features specifically **designed by welders, for welders.**

Ultra-high-efficiency filters provide protection with less breathing resistance — up to 55% less. Protective grill keeps filters from being damaged.

Built-in fit check on exhaust valve and **quantitative fit testing port** for easy compliance testing.

Fits under welding helmet with downward-facing, non-return exhaust valve that nearly eliminates mask condensation, keeping vision clear throughout the workday.

A Full-Featured Half-Mask

- 1. Advanced P100 Filters**
Provide up to 55% less breathing resistance
- 2. Integrated Pre-Filter**
Increases filter life
- 3. Large Downward-Facing Exhaust Valve**
Reduces welding helmet and eyewear fogging
- 4. Built-In Fit Check on Exhaust Valve**
Allows operator to conduct daily fit checks
- 5. Built-In Sample Port**
Simplifies fit testing
- 6. Better Sizing for a More Universal Fit**
Options to fit all face sizes
